FUNDAMENTALS OF WEB DEVELOPMENT

Learn the building blocks of the web.

Structure

Code

Styling

Interactivity

Deployment

Build Websites. Create Solutions. Connect the World.

1. INTRODUCTION TO WEB DEVELOPMENT

Web Development is the process of creating **websites** and **web applications** that run on the internet or on private networks.

Types of Web Development

Frontend Development

Focuses on the visual part that users see and interact with.

- HTML
- CSS
- JavaScript

Backend Development

Focuses on server-side logic, databases and application functionality.

- Python
- Java
- Node.js
- PHP

Full Stack Development

Works on both frontend and backend to build complete web applications.

How Websites Work (Simple Flow)

User

Browser
(Sends Request)

Server
(Processes Request)

Database
(Stores Data)

Response
(Shown to User)

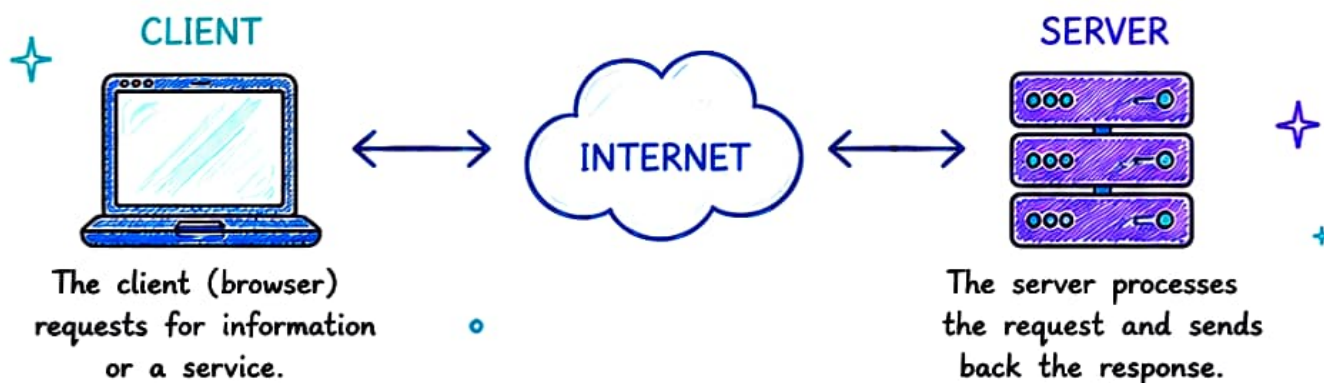

“ Web Development is not just about code, it's about creating **experiences**. ”

1. INTRODUCTION TO WEB DEVELOPMENT

Client-Server Architecture

Static vs Dynamic Websites

Static Website

- Fixed content
- Same for every user
- Faster
- No database required
- Built using HTML, CSS

Examples: Portfolio, Brochure Sites

Dynamic Website

- Content changes
- Different for different users
- Uses databases
- Interactive & powerful
- Built using Frontend + Backend

Examples: Facebook, Amazon, Netflix

Technologies Used in Web Development

“ Every website you see is the result of these technologies working together. ”

1. INTRODUCTION TO WEB DEVELOPMENT

Key Components of a Website

- 1 **Domain Name** - The address of the website (e.g., www.example.com)
- 2 **Hosting** - The server space where website files are stored.
- 3 **Frontend** - What users see and interact with.
- 4 **Backend** - The server-side logic and processing.
- 5 **Database** - Stores and manages data.
- 6 **APIs** - Allow different systems to communicate.

Popular Examples

YouTube
(Frontend rich platform)

Amazon
(Full Stack E-commerce)

Instagram
(Backend + Database)

Netflix
(Streaming Platform)

Career Roles in Web Development

- Frontend Developer
- Backend Developer
- Full Stack Developer
- Web Designer
- UI/UX Designer
- DevOps Engineer

“

The web is everywhere.
build the future it works better!

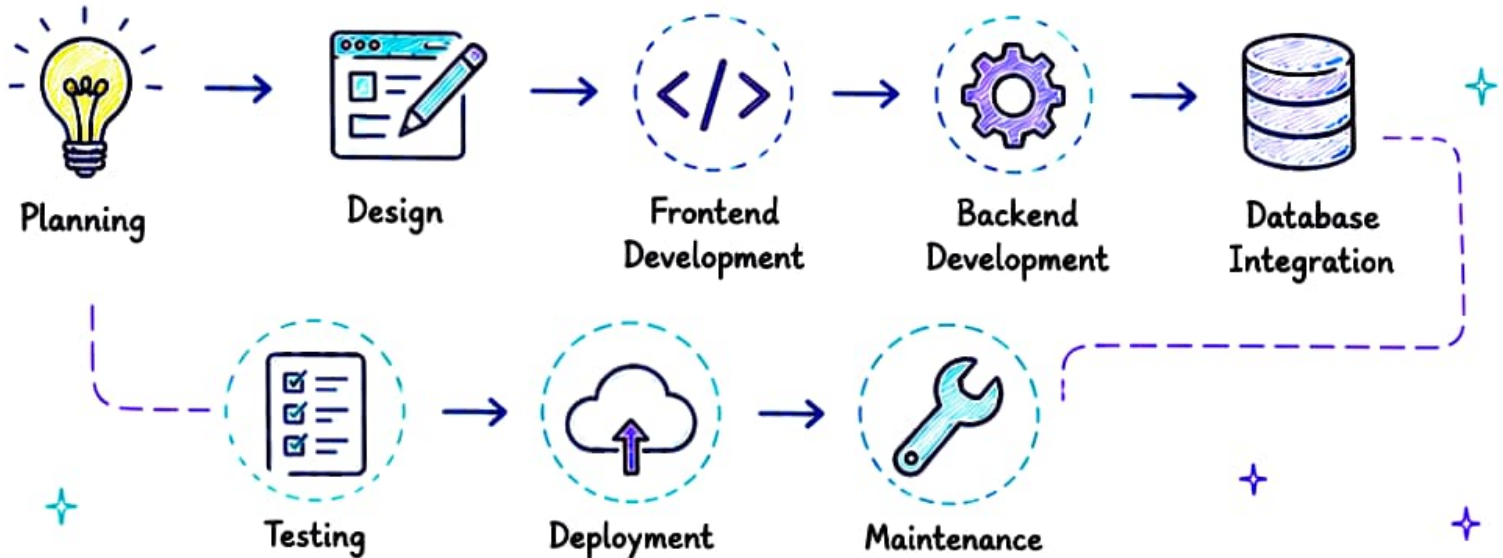

”

1. INTRODUCTION TO WEB DEVELOPMENT

Basic Workflow of Web Development

Advantages of Web Development

- ✓ **Global Accessibility**
Access from anywhere in the world.
- ✓ **Business Growth**
Helps businesses reach more customers.
- ✓ **Automation**
Reduces manual work and improves efficiency.

“ Plan well, build smart,
test thoroughly, and
keep improving. ”

Quick Recap

- ✓ Web Development = Frontend + Backend + Database
- ✓ Websites work using Client-Server Communication
- ✓ HTML, CSS, JavaScript are the core of Frontend
- ✓ Databases store and manage data
- ✓ Web Development has endless opportunities!

“

Learn the basics today,
build the future tomorrow.

”

1. INTRODUCTION TO WEB DEVELOPMENT

Best Practices

- ✓ Write **clean**, **readable** and well-structured code.
- ✓ Use **meaningful** names for files, folders & variables.
- ✓ Keep your code **modular** and reusable.
- ✓ Follow **consistent** indentation and formatting.
- ✓ **Test** your website on different devices and browsers.
- ✓ Keep **learning** and stay updated with new technologies.

Common Mistakes to Avoid

- ✗ Not planning before starting the project.
- ✗ Writing messy and unorganized code.
- ✗ Ignoring responsive design.
- ✗ Not testing across browsers and devices.
- ✗ Hardcoding values instead of using variables.
- ✗ Ignoring website performance and SEO.

Tools for Web Development

-  VS Code - Code Editor
-  Google Chrome - Browser
-  Git & GitHub - Version Control
-  Figma - UI/UX Design
-  Postman - API Testing
-  Netlify - Deployment

Summary

Web Development is the process of building websites and web applications that power the internet.

It involves **Frontend**, **Backend**, **Database** and everything in between working together to deliver amazing experiences to users around the world.

“

Code is not just about computers,
it's about **solving problems** and creating a **better world**.

”
